French & Canadian Citizen

Profile

Economist by training, French and Canadian national. I work at the intersection of sustainable finance and BI engineering, building the ESG data pipelines, carbon reporting, and executive dashboards that institutional investors run on. Three years across CDPQ, Maxa AI, and now the Sustainable Investing team at Investissement Québec.

Experience

Investissement Québec Montreal, Canada
Analyst, Sustainable Finance and Business Intelligence Aug. 2026 - Present

- Improve data processing workflows in Python and SQL for the Sustainable Investing team, increasing the reliability of recurring portfolio analyses.
- Build and enhance Power BI dashboards supporting sustainable investing analysis and reporting.
- Analyze communications and marketing data to measure the effectiveness of corporate events and web marketing campaigns.

Maxa AI Montreal, Canada
Business Analyst & Business Intelligence Developer Jan. 2026 - Aug. 2026

- Led client discovery sessions across aviation, manufacturing, and transportation, translating business requirements into data specs and aligning analytics engineers and DevOps teams on dbt and Snowflake implementations.
- Built and maintained Power BI dashboards on Snowflake data marts, delivering P&L, sales performance, and inventory analytics across client environments.
- Built a Python QA framework (Snowflake CLI and Power BI Service API) to validate Maxa Analyst conversational AI outputs against ground-truth data mart values before production release, covering token-based auth and multi-client configs.

Caisse de dépôt et placement du Québec (CDPQ) Montreal, Canada
Business Intelligence Analyst, Sustainable Investing Feb. 2024 - Jan. 2026

- Pioneered the analytics function within the Sustainable Investing team, transitioning from fragmented Excel-based processes to scalable, automated BI infrastructure.
- Built and maintained the Python ETL pipeline powering CDPQ's annual public ESG carbon footprint report, cutting processing time from weeks to days.
- Built and maintained 20+ Power BI dashboards enabling portfolio managers and executives to monitor ESG KPIs across the global portfolio.
- Developed an SDG assessment tool to quantify portfolio exposure to UN Sustainable Development Goals across equity and corporate credit asset classes, measuring alignment and misalignment.

Analyst Intern, Economic and Financial Analysis Aug. - Dec. 2023

- Monitored Canadian and U.S. macroeconomic indicators (equity markets, employment, trade, inflation, and monetary policy) to contribute to weekly economic reviews presented firm-wide.
- Enhanced Bloomberg-linked Excel dashboards using VBA macros, reducing manual preparation time for weekly reporting.

Analyst Intern, Geopolitical and Cross-sectoral Risk May - Aug. 2023

- Researched geopolitical and cross-sectoral risks including friendshoring and nearshoring trends amid global supply chain disruptions, producing analytical reports to support portfolio management decisions.
- Built an Excel dashboard aggregating key macroeconomic indicators to streamline data sourcing for team presentations.

Education

HEC Montreal Montreal, Canada
Master of Science in Applied Economics 2021 - 2023

- Thesis: Type of financing and spending multiplier in a liquidity trap - DSGE analysis of fiscal stimulus effectiveness by financing method.
- Honor Roll (Winter 2022), GPA: 4.04/4.3.

BBA, International Business & Applied Economics 2018 - 2021

- Study abroad semester at National Chengchi University, Taipei (2020).
